

Hello! I'm Belén, and I'm a designer who works in both UX/UI design and front-end development. I come from a background in graphic and multimedia design, but I quickly realised that my place was in the digital world. That's why I'm finishing a Master's Degree in Interactive Design, where I'm focused on transforming ideas into user experiences that work, both on screen and in code.

My process always starts with empathy. I love researching what people need, turning those ideas into interactive prototypes and, best of all, bringing them to life in the browser.

I like to be involved in the entire product process. Right now, I am developing my knowledge of JavaScript and frameworks such as Vue and React to build interfaces that not only look good, but also feel incredibly fluid and accessible.

I firmly believe in the power of collaboration. The best products emerge when design and code go hand in hand. I am naturally curious, always seeking to learn something new to bring a more comprehensive vision to each project.

EDUCATION

2024-2025

ESD Madrid-Master's in Interactive Design

2019-2024

UDIT- Degree in Graphic and multimedia design - Madrid

2017-2019

Bachelor's Degree in Technological Sciences – Jimenez de la Espada Institute (Cartagena, Murcia)

2015-2017

Secondary education (ESO) – Hispania School (Cartagena, Murcia)

2007-2015

Primary and secondary education (ESO) – King's College Murcia

LANGUAGES

Castellano - Mother tongue

Inglés - Bilingual

SKILLS

Adobe Suite

3D - Blender + Maya + Cinema 4D

Communication + Organisation

EXPERIENCE

Internship at GING (Next Generation UPM

Research Group): Front-end Designer |

April-June 2025

Web Design:

VisualStudio (React, JS, Vue, Nuxt)

Figma
